Appl. No. 09/474,317
Amdt. dated August 19, 2004
Reply to Office Action of February 19, 2004

PATENT

Amendments to the Specification:

Please replace paragraph beginning on page 5, line 20 with the following amended paragraph:

In the second scenario, shown in Figure 2, user site 201 also typically communicates with ISP site 200 via PPP or SLIP protocol. In this scenario, the Internet Protocol (IP) packet header (described in detail below) is set up with appropriate Internet source and destination addresses by the operating system (e.g., Windows 9x) in user's personal computer PC 201(a). The destination Internet address information is typically provided to PC ~~2012(a)~~ 201(a) by a name server which is either in communication with, or located at, ISP site 200.
